

Conference Attendance

Attendance Green Party Conference, 2015

(Fylde Scholarship funded train fares)

The Green Party Conference in Bournemouth was a 3 day event.

The structure of the conference entailed having daily fringe sessions on political discussion for a variety of niche topics. I really enjoyed attending the fringes as they allowed me to become more aware of issues such as electoral reform, environmental degradation and other policies. Furthermore, I was allowed to get a great a good understand of how the England and Wales Green Party works in terms of creating policy; at the party democratically debates and votes on party policy this gave me a great first hand experience of the process.

I also was able to meet 2 MEP's over the time I was down there, and take away political material on economic sustainability that will certainly help me with my studies and I am very grateful for the opportunity Fylde College gave to me by providing funding for me to go down.
